ABSTRACT

A survey of student charges at state universities and land grant colleges shows that the percentage rise of median undergraduate tuition and fees is less than the percentage rise of the consumer price index, that non-resident tuition is up almost 10 percent, that New England has the highest median regional student cost, and that resident medical and dentistry students and non-resident veterinary medicine students pay the largest tuition increases for 1979-1980. Other findings revealed that non-resident students lead in median of tuition differences over the previous year, that only two institutions held the line on all undergraduate costs, that public higher education costs vary widely from campus to campus, that highest and lowest cost by campus follow the usual regional patterns, and that long-term median tuition rises outstrip the long-term rise in the higher education price index. Data revealed that the median total undergraduate costs jumped less than the long-term rise of the higher education price index over the past decade. An alphabetical-by-state listing shows the changes in student charges in each category over the 1978-1979 figures. (Author/PHR)

PERCENTAGE RISE OF MEDIAN UNDERGRADUATE TUITION & FEES LESS THAN PERCENTAGE RISE OF CONSUMER PRICE INDEX OVER LAST YEAR

The median tab this year for an undergraduate's tuition and fees at one of the nation's major public universities for 1979-80 will be $781, compared to $724 in 1978-79, an increase of 7.9 percent. The average Consumer Price Index (CPI) from fiscal year 1978 to fiscal year 1979 rose 9.3 percent, according to D. Kent Halstead, research economist at the National Institute of Education in Washington, D.C.

The median for total charges--tuition, required fees, room and board--for a state resident attending a major state university or land-grant college during 1979-80 will be $2,333, compared to $2,221 in 1978-79, an increase of five percent.

Table 1 shows a two-year comparison of median undergraduate charges at state universities and land-grant colleges for state residents and non-residents.

n = number of respondents. To be included in Total charges, a respondent had to be a four-year, Ph.D.-degree granting member institution that offered room and from 19 to 21 meals a week.

[1]These are the median charges for room and board at institutions charging separately for each of these services.

[2]These are the median total charges for room and board, at all institutions offering these services, whether charges are made separately or as one combined fee.

The Office of Communications Services (OCS) of the National Association of State Universities and Land-Grant Colleges (NASULGC) received data on student charges from 229 campuses, out of a total of 259 four-year member campuses. The campus response rate for this report is 88.4 percent.

OCS received data from all but two of the Association's 142 member institutions in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands.

Of a total of 229 respondents, 166 met the criteria for inclusion in the statistical tables comprising this report. The criteria are: (1) a four-year campus; (2) a PhD-granting institution; and (3) a campus that offers room and from 19 to 21 meals per week. The remaining 63 campuses, which were not included in comparisions, are included in the table on pages 14 through 22.

NON-RESIDENT TUITION & FEES JUMP ALMOST TEN PERCENT

Out-of-state undergraduates can expect to pay almost 10 percent more for tuition and fees at state and land-grant universities this year than they did in 1978-79. The median charge for non-resident undergraduates in 1979-80 is $1,877, compared to $1,701 in 1978-79, an increase of 9.8 percent. (In NASULGC's 1978-79 survey on student charges, the increase for non-resident undergraduates was only 1.9 percent above 1977-78 figures.)

Median total charges for non-residents this year are $3,667, compared to $3,451 last year, an increase of 6.3 percent.

This year, the median room rate is $690, a rise of 7.9 percent over last year's median rate of $639, for the 70 comparable campuses which provided data on separate room charges. The median board rate rose 4.2 percent at 59 comparable campuses, from $794 to $827.

Combined room and board, including data for campuses which charge separately for these services and those which have one combined charge, went up almost six percent, from $1,500 to $1,589. One hundred and sixteen comparable campuses provided information about room and board.

Two primary reasons cited by respondents for increases in student charges were: (1) inflation, mentioned by almost two-thirds of those institutions which reported an increase in charges over last year, and (2) the necessity to maintain program quality, cited by more than one-third of the reporting group. Other reasons cited included the absence of alternative sources of revenue, the need to raise faculty and staff salaries, and inadequate appropriations from state legislatures.

NEW ENGLAND LEADS REGIONS AGAIN IN UNDERGRADUATE TUITION & FEES

In a regional comparison of median undergraduate tuition and fees for 1979-80, member institutions in New England lead both the resident and non-resident categories.

The median charge for resident students ranges from a high of $1,011 in New England to a low of $602 in the Southeast.

In the non-resident category, New England leads, with a median charge of

$2,703, followed by the Midwest ($2,212), the Southeast ($1,958), the West ($1,647) and the Middle Atlantic states ($1,525.)

Table 2 gives a regional comparison of median charges for undergraduate tuition and fees for 1979-80.

TABLE 2

RESIDENT MEDICAL AND DENTISTRY STUDENTS & NON-RESIDENT VETERINARY MEDICINE STUDENTS TO PAY LARGEST TUITION INCREASES THIS YEAR

The median charge for tuition and fees for resident graduate students is up 8.1 percent this year, from $791 to $855. Non-resident graduate students will pay a slightly higher increase of 9.6 percent. The median charge for non-resident graduate students in 1979-80 is $2,000, compared to $1,825 in 1978-79.

Resident medical and dentistry students and non-resident veterinary medicine students will pay higher tuition charges of more than 10 percent over last year. Dentistry school tuition was up 10.7 percent from last year. Resident medical students and non-resident veterinary medicine students will pay whopping increases of 16.2 and 17.7 percent respectively. All other increases at comparable reporting graduate and first-professional schools were less than 10 percent.

All median tuition charges for 1979-80 at these campuses continued to be at least $1,000, with the exception of charges for resident graduate students and resident law students.

Table 3 gives complete information on median charges at comparable reporting graduate and professional schools for 1979-80 and 1978-79, and the amount and percentage of change.

NON-RESIDENT STUDENTS LEAD IN MEDIAN OF TUITION DIFFERENCES OVER LAST YEAR

Of those comparable respondents that raised tuition and required fees, the highest median increments were for non-resident students at all levels, from undergraduate to graduate and first-professional schools. In all cases, the median of the differences increased more than $100.

The highest median of the difference was for out-of-state students attending schools and colleges of veterinary medicine ($375), followed in order by non-resident medical, dentistry, law, undergraduate and graduate students.

The largest median increase for resident students was at schools and colleges of medici..e ($200) and dentistry ($123). The remaining median of the differences for resident students ranged from $92.50 for veterinary medicine students to $28 for resident graduate students.

Table 4 shows the median of the differences of tuition and required fees at those member campuses that changed student charges for 1979-80.

ONLY TWO INSTITUTIONS HOLD THE LINE ON ALL UNDERGRADUATE COSTS

Kansas State University and Virginia State University were the only two institutions this year which did not raise total charges (tuition and required fees and room and board) for resident and non-resident students.

In 1978-79, 24 campuses held the line on total charges. In 1977-78 there were 32 such campuses, and in 1976-77 fifteen campuses reported that they did not raise total charges.

Looking at each category separately, 68.6 percent of comparable respondents (107 campuses) raised resident tuition and fees for undergraduates and 71.8 percent (112 campuses) raised non-resident undergraduate charges this year.

Separate room charges, reported by 70 respondents, were increased on 63 campuses. Fifty-two of the 59 campuses which reported separate board charges for both years listed increases. Of the 45 campuses which charged a combined room and board charge, 43 showed increases.

The following 49 campuses did not increase resident undergraduate tuition and fees:

Auburn University, Auburn
Univ. of Arkansas, Fayetteville
Univ. of Arkansas, Pine Bluff
Arizona State University
University of Arizona
Univ. of California, Los Angeles
Univ. of the District of Columbia

Among graduate and first-professional schools the highest percentages of tuition and fees changes were reported by schools and colleges of medicine, with 46 out of 57 campuses, or 80.7 percent, reporting higher charges for resident students, and 83.3 percent (45 out of 54) reporting increased charges for non-resident students.

Seventy-one percent (40 campuses out of 56) of the charges for resident law students increased, and 78.6 percent (44 campuses out of 56) of the charges for non-resident law students increased. A little over two-thirds of the resident and non-resident tuition and fees charges for graduate students increased. This year 102 out of 156 campuses reported graduate tuition and fees increases for resident students, and 104 out of 156 campuses showed increases for non-resident graduate students.

PUBLIC HIGHER EDUCATION COSTS VARY FROM CAMPUS TO CAMPUS

The amounts paid for tuition and fees and for total charges by undergraduates who attend state and land-grant universities vary widely. The Massachusetts Institute of Technology, one of the Association's private members, tops the scale in three categories: resident undergraduate tuition and fees, resident total charges and non-resident total charges. The University of Colorado, Medical Center charged the highest non-resident undergraduate tuition and fees. As both institutions are atypical, they have been omitted from Tables 9 and 10 on pages 12 and 13.*

*MIT is atypical because it receives no state appropriations. The University of Colorado,Medical Center is atypical because its undergraduate program is not a four-year course of study.

The New York State Colleges of Cornell University ranked first this year in two categories: resident tuition and fees and resident total charges. The University of Vermont topped the lists of highest non-resident tuition and fees and non-resident total charges.

There were 24 campuses with charges of more than $1,000 for resident undergraduate tuition and fees, compared with 15 campuses last year. At the bottom of the scale, only 11 campuses had charges below $400, the same as last year.

The majority of the 1979-80 charges were in the $700-$999 range. Seventy-nine of the 156 survey respondents included in the two-year median comparison charged undergraduates within that range. Forty-nine campuses charged from $400-$699, and 24 charged more than $1,000.

There was a much wider spread in undergraduate tuition and fees charges for non-residents. Eighty-three of the 156 campuses reported charges between $1,000 and $1,999, and 65 of these reported charges between $1,400 and $1,899.

Seven campuses charged undergraduate non-residents less than $1,000 in tuition and fees, compared to four campuses last year. Twenty campuses charged $3,000 and above, compared to seven campuses last year. The remaining 53 campuses (compared to 54 last year) charged from $2,000 to $2,999.

Table 5 summarizes the range of charges for undergraduate tuition and fees for residents and non-residents for 1979-80.

Total resident undergraduate charges, which were calculated only for those campuses which charged tuition and fees and room and board, spanned a range of $7,011 from highest to lowest.

Texas Southern University charged the lowest resident undergraduate total charge of $1,147. Excluding MIT and the New York State Colleges of Cornell University, the highest total charge reported, was $3,810, the amount required for a year of study at Temple University.

Twenty-five of the 109 campuses that provided comparable information charged less than $2,000 for tuition and required fees, room and board. Fifty-one campuses charged from $2,000 to $2,499, and the remaining 41 campuses charged more than $2,500.

There was a much wider spread in total charges for out-of-state students. Eighteen campuses reported charges of over $4,700, compared to six last year. Excluding MIT, the highest total charge for non-resident undergraduates was at the University of Vermont, Burlington, which charges $6,199 for a full-year of study.

The lowest total charge for non-resident undergraduates was $1,557 at the University of Alaska, Fairbanks. Two campuses reported total charges for non-residents of less than $2,000 compared to one campus last year. Twenty-two campuses charged between $4,000 and $4,699, compared to 25 campuses last year.

Charges at the remaining group of 75 campuses were distributed fairly evenly between $2,000 to $3,999. The largest concentration within this range was at the eight campuses which reported charges between $3,800 and $3,899. In 1978-79, no campuses fell within this range.

Table 6 summarizes the ranges of total charges for resident and non-resident undergraduate students for 1979-80.

HIGHEST, LOWEST COSTS BY CAMPUS FOLLOW USUAL REGIONAL PATTERNS

Rankings of the ten campuses of state and land-grant universities with the highest and lowest charges for undergraduate tuition and required fees followed traditional regional patterns. Seven campuses in Texas, one in the District of Columbia, and two in Alaska comprise the list of the ten lowest charges for tuition and fees for resident undergraduates. Four campuses in Pennsylvania, two in New England, one in New York, two in Michigan and one in Colorado comprise the list of campuses with the highest charges for tuition and fees for resident undergraduates.

For non-resident undergraduates, the ten campuses with the lowest charges for tuition and fees include three historically black campuses, four campuses outside the continental United States, and three campuses in southern or southwestern states. Seven of the ten campuses with the highest charges for non-resident undergraduates are the same as those with the highest charges for resident undergraduates. The University of Wisconsin--Milwaukee, the University of California, Santa Cruz and the University of Wisconsin--Madison complete the list.

As for total charges for resident undergraduates, the ten campuses with the lowest include six historically black campuses, two campuses outside the continental United States, and the University of Texas at El Paso and Oklahoma State University.

Five of the ten campuses with the highest total charges for resident undergraduates are the same as those on the top ten list for tuition and fees only. Of the remaining five, two are in Ohio, one is in New England, one is in New York, and one is in a middle Atlantic state.

For non-resident undergraduates, six of the ten campuses with the lowest total charges are on the list of ten campuses with the lowest charges for tuition and fees. Three of the remaining four are historically black campuses, and the fourth is in Texas.

The list of the top ten campuses for total charges for non-resident undergraduates includes seven of those in the top ten for tuition and fees, plus the University of California, San Diego, the University of California, Irvine, and the University of California, Berkeley.

Tables 9 and 10 on pages 12 and 13 rank the ten campuses with the highest and lowest charges for tuition and required fees and the highest and lowest total charges.

LONG-TERM MEDIAN TUITION RISE OUTSTRIPS LONG-TERM RISE IN HIGHER EDUCATION PRICE INDEX

The NASULGC Office of Communications Services (formerly the Office of Research and Information) has surveyed its members institutions regarding tuition and fees since 1965. From 1965-66 to 1979-80, median charges for resident undergraduate tuition and fees have risen from $311 to $781, an increase of 151.1 percent.

The median undergraduate tuition and fees increase for non-residents has grown from $734 in 1965-66 to $1,877 in 1979-80, an increase of 155.7 percent.

These percentage increases have outstripped the percentage rise of the Higher Education Price Index, which was developed by D. Kent Halstead of the National Institute of Education. From 1965 to 1979, the prices that colleges and universities pay for goods and services rose 140 percent. This indicates that state universities and land-grant colleges have had to look increasingly to tuition and fees for revenue, as the real income from other sources has been depleted by inflation.

Table 7 shows median charges for undergraduate tuition and required fees since 1965-66 and the dollar and percentage increases for each academic year. The number of respondents supplying data for Table 7 varies from year to year, and therefore the respondents are not a directly comparable group of campuses.

MEDIAN TOTAL UNDERGRADUATE COSTS JUMP LESS THAN LONG-TERM RISE OF HIGHER EDUCATION PRICE INDEX OVER PAST DECADE

The National Association of State Universities and Land-Grant Colleges began to monitor total undergraduate costs in 1969-70. Over the past ten years, median total costs for resident undergraduates have risen less than the Higher Education Price Index has risen. Median total costs for non-resident undergraduates have risen at about the same rate as the Higher Education Price Index.

From 1969-70 to 1979-80, median total charges for resident undergraduates moved from $1,297 to $2,333, a jump of 79.9 percent. Median total costs for non-resident undergraduates rose from $1,910 in 1969-70 to $3,667 in 1979-80, an increase of almost 92 percent. The Higher Education Price Index rose 91.8 percent from 1969-70 to 1979-80.

Table 8 shows median total undergraduate charges since 1969-70 and the dollar and percentage increases for each academic year. The number of respondents supplying data for Table 8 varies from year to year, and therefore the respondents are not a directly comparable group of campuses.
